

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

Industry Comments		
General Comments:	Ref	CBB's Response
<p>An insurer stated that as a Retakaful / Reinsurance company, many of the issues that are important to the direct company are not directly applicable or secondary to the operation of a Retakaful Company, specifically on the topics of pricing and the actuary.</p> <p>As a retakaful operator the health of the direct business is fundamental to their sustainability, they therefore encourage that focus be placed on the technical results of the takaful companies before wakala fees. If the takaful operator continuously produces a loss before charging Wakala fees, it is inevitable that the company will not survive. Furthermore it is necessary to clearly define which rules are applicable to a Takaful Operator and which are applicable to a Retakaful Operator, because of the fundamental differences in the operations.</p>	GR1	<p>Noted.</p> <p>Although there are fundamental differences in the operations of the retakaful company compared to Takaful operator, the CBB rules have been drafted in a way that is equally effective and relevant to the retakaful operators.</p>
<p>An insurer suggested, with regards to the proposed changes in Module AU, that the Head of Risk Management can be combined with the position of Compliance Officer or MLRO as an additional portfolio. This would enable the Insurance Company to use the experience and skill of the officer to the optimum level.</p> <p>They also stated that the proposed changes may be implemented in a phased manner over a period of 3 years to enable companies to comply with the new regulations.</p>	GR2	<p>The CBB agrees to the concept of combining the Risk Management function with any other relevant function provided that there is no conflict of interest and the person is competent and capable to perform multiple functions efficiently and effectively.</p> <p>Paragraph AU-1.2.3 will be amended accordingly to be read as follows:</p> <p><u>Controlled functions</u> may be combined with any other functions, subject to the CBB's prior written approval and such</p>

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

		<p>combination must not result in any possible conflict of interest. The Takaful and Retakaful industry must fully comply with the new rules and requirements latest by 31 December 2014.</p>
<p>An actuary stated that the Motor and Medical business are the largest lines in most insurance companies in Bahrain, which puts companies under a potential pricing risk, especially with higher retention level or full retention. These lines of business are also highly competitive and when corners are cut, then the consumer suffers in terms of declined claims, delayed payout or outright refusal to pay. Therefore, insurance companies should set technically and actuarially adequate prices for these two lines of business. They recommend annual pricing exercises for motor and medical based on the company’s historical claims data and experience per different risk factors, taking into consideration other elements such as claims cost inflation, expense loading, profit loading. This might be enshrined in Volume 3 (Insurance), or it might be set as a separate requirement by the CBB from time to time.</p>	GR3	<p>The CBB agrees that pricing should be adequate for all lines of businesses including motor and medical. Paragraph AA-4.3.1(g) sufficiently covers the issue raised and hence no change to the proposed rule is required.</p>
<p>An actuary stated that Risk Management is at its core an actuarial discipline, which is: consider future events, with a range of probability of occurring (frequency) and a range of severity of the impact of the outcome, should it occur. Combine frequency and severity to calculate expected outcomes and ranges of expected outcomes. The CBB may therefore wish to require actuarial input in the FCR (AA-4.3.1) on various Risks the company faces, the risk management program, and to provide recommendations.</p>	GR4	<p>The CBB agrees that Risk Management is also an actuarial discipline but it is also important that actuary possess the required certification of Chartered Enterprise Risk Analyst (CERA) or equivalent with relevant experience to perform the function. No change to the rules required.</p>
<p>An actuary noted that in line with the new requirements for a Financial Condition Report, a three to five year financial projection and business plan with actuarial sign-off would be ideal for all insurance companies. This will evaluate capital requirements, size</p>	GR5	<p>Disagree as this would be a too restrictive requirement for companies.</p>

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

<p>of business, expense, planned growth and other important factors and give an overall view as to where the Bahrain insurance market is heading.</p>		<p>No change to the rules required.</p>
<p>An actuary suggest also that an actuarially signed Business Plan and Financial Projections are made part of the application requirements for any entity wishing to establish a new insurance company in Bahrain.</p>	<p>GR6</p>	<p>See comments to GR5 above.</p>
<p>An actuary noted that 31 December reporting dates for all insurance companies place a strain on actuarial resource, and for the rest of the year there is little work. Possible staggering of reporting dates would be helpful.</p>	<p>GR7</p>	<p>Disagree. No change to be made for consistency purposes.</p>
<p>An insurer noted that currently receivables exceeding 6 months are disallowed for solvency calculations. Considering the delay of premium settlement from Government/ Government bodies and also receivables on account of motor subrogation claims from Insurance companies, they request CBB to consider extending the restriction to one year.</p>	<p>GR8</p>	<p>Do not agree with the comment. The CBB believes that assets receivable beyond six months must not be considered admissible for solvency calculations as the quality of capital is compromised.</p>
<p>Insurers noted that they would like to draw CBB’s attention and due consideration to the following:</p> <ol style="list-style-type: none"> 1. The Takaful Committee formed in January 2012 by CBB representing the takaful industry and the CBB discussed various issues in the Committee meetings and submitted individual company’s feedback on the then proposed regulations prior to the memo as per point 2 below. 2. CBB vide letter EDFIS/176/2012 dated 13th September 2012 informed individual Takaful companies about CBB’s intention to apply new approach in calculating the solvency status by combining the assets of both Shareholders Fund and Policyholders Funds. Qard Hassan will be required only in case of cash deficit. 	<p>GR9</p>	<p>Do not agree.</p>

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

<p>3. Based on the above memo, the Companies have obtained resolution from their respective Sharia Supervisory Boards approving the proposed application of solvency calculation by combining the assets of both Shareholders Fund and Policyholders Funds.</p> <p>4. The Companies were taken by surprise with the fact that the new proposed framework subject to consultation covers various issues which were not agreed in the Committee meetings and also not mentioned in the CBB memo EDFIS/176/2012.</p> <p>5. The new regulations, if applied, will be detrimental to Takaful companies on the following grounds:</p> <ul style="list-style-type: none">a. Bahrain Takaful industry is small and is still not matured enough unlike Malaysia, Sudan and other larger markets.b. The stringent and unique new proposals will deter any new entrants to the Bahrain Takaful market.c. The proposed writing off of the Qard Hassan and the Earmarking of assets involves a double impact on Takaful operators and it is like penalizing twice.d. The Companies are of the opinion that some of the proposals are not in accordance with Sharia principles (e.g writing off Qard Hassan) which will not be accepted or approved by companies' Sharia Supervisory Board and Board of Directors/Shareholders.e. Some of the proposals will trigger high level changes in the IT systems which will be time consuming and very costly thereby contribution to more deficits (viz. payment of commission from SH Fund).f. Some of the proposals (viz Head of Risk Management, Internal Sharia Reviewer, Actuarial valuation and Financial Condition Report) will add substantial cost and the Takaful companies being small will face undue severe financial burden.		<p>Comment 5(c) was discussed at length with the Takaful and retakaful industry and has now been clarified to opt for write off or repayment.</p> <p>In case of comment 5(d), most of the firms are testing the impairment of Qard Hassan on an annual basis and disclosing it in their annual financial statements. Hence the comment is not valid.</p>
---	--	--

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

<p>6. The long pending request of Takaful companies is for an equal opportunity and an equal level playing field compared to Conventional Insurance companies. Whereas, what they get now is more stringent and biased proposals seemingly against the Takaful companies. A conventional company having accumulated losses with a positive capital available is not required to earmark assets, whereas if it is a Takaful company, it is required to write-off Qard Hassan and Earmark assets.</p> <p>7. The Companies still hope CBB should allow takaful companies to work out the solvency by combining the assets of Shareholders Funds and Policyholders Funds as agreed in the initial meetings and proposed by CBB as cited in point 2 above. This will put the takaful companies at par with conventional companies.</p> <p>8. In the proposed regulations, the Companies are not allowed to charge any performance fees to the policyholders' fund. Performance fee is charged by the operator only when the Policyholders Fund generates surplus. In the absence of performance fee, there is no incentive to the operator to run the takaful funds profitably.</p> <p>9. The application of the proposed regulations in its present form may force some of the Takaful companies to seek voluntary liquidation as they cannot afford to write off the Qard Hassan and simultaneously Earmark assets for solvency.</p> <p>10. Though they firmly believe that the proposed regulations place the Takaful industry in Bahrain at a disadvantage compared to Conventional peers and that its application in its present form will be detrimental to the Takaful industry particularly and Bahrain's standing as an Islamic Finance Hub overall, they furnish below for the CBB's consideration the Companies' detailed comments on the critical regulations/rules proposed by CBB.</p>		<p>This is what CA-8.4.2 is allowing.</p> <p>Performance fee will not be allowed as the CBB believes that the surplus generated by the Participants' fund is for the participants of that fund.</p> <p>The Rule now allows for repayment as well</p>
---	--	--

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

<p>Insurers noted that currently receivables exceeding 6 months are disallowed for solvency calculations. Considering the delay of premium settlement from Government/Government bodies and also receivables on account of motor subrogation claims from Insurance companies licensed by CBB, they request CBB to consider extending the restriction to ONE YEAR for all Policyholders receivables.</p> <p>Ideally the six months restriction on receivables from Insurance companies licensed by CBB towards Motor Subrogation claims to be removed completely. While they agree with the CBB’s objective of having good quality assets backing solvency, motor subrogation recoveries do not involve any credit risk, it is just a matter of timing risk whereby the Companies’ are unfairly penalized for the behavior of other counterparties who do not operate platforms that allow recovery within the 6-month window.</p>	GR10	See comments to GR8 above.
<p>An insurer noted that the consultation letter has raised some very important issues. Firstly, the question of the solvency margin which is closely related to risk management and the assets of the company come under the authority of the Board of Directors. Secondly, the changes proposed to the capital adequacy module refers to increasing the capital of the company in case the solvency margin falls below the required minimum without referring to the period within which the capital is to be raised and whether it is temporary or permanent. Thirdly, as the CBB knows, the solvency margin requirement can be more easily adjusted by ceding excess exposure to reinsurers. Because of the seriousness and the impact of the proposed changes on the companies, they have already appointed an actuarial firm, Sigma Actuaries, to address this issue as well as the controls required for all their risks. This report will be passed to the Board of Directors for their evaluation and only then it would be forwarded to the CBB. Due to the enormity of this requirement, they would appreciate if the CBB would allow them an extension of 45 days to provide their response to the CBB.</p>	GR11	<p>The new proposed solvency framework is for Takaful/ ReTakaful companies and not applicable to conventional companies.</p> <p>However, rules on Risk Management function and its requirements are applicable to both conventional and Takaful companies.</p>

Industry Comments and Feedback

Volume 3

November 2013

<p>(g) In the case of an overseas insurance firm, the audited net assets (excluding any unrealised fair value gains and the surplus assets of long-term funds), determined in accordance with accounting standards that would be applicable if it were a joint stock company incorporated in Bahrain.</p>			
<p>CA-8.2 (CA-8.2.1, CA-8.2.2, CA-8.2.2A, CA-8.2.2B, CA-8.2.2C, CA-8.2.2D and CA-8.2.6)</p>	<p>An insurer noted that to be reasonably precise in Wakala fee % may not be possible. To arrive at the close estimation of wakala fee %, it will require a number of assumptions and scenarios and past market historical trend/data which are not readily and widely available. However despite from these studies, there is still the probability that actual is not in line with upfront estimation. Further to this it would require significant investments in systems and processes.</p> <p>The current model is already adhering to CA-8.2.2 and CA-8.2.2A to the best estimate of the market. Due to the inherent limitations in making estimation, therefore the incentive fee is adopted in the existing model.</p> <p>Therefore, CA-8.2.1 should go along with CA-8.2.2B-D. They are related to each other and due to this; they believed that these proposals should be revisited.</p>	<p>SP2</p>	<p>Disagree with the comments made. Wakala fee must be calculated as specified under CA-8.2.2B.</p>

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

CA-8.2 Page 2 of 2	An audit firm noted that the content is not clear, seems like a misplaced page break	SP3	Noted
CA-8.2.1 All Takaful firms licensed in Bahrain must organise and operate their business according to the al Wakala model. Specifically, in exchange for the provision of management services to participants' fund(s), the shareholders of the Takaful firm must receive a specific consideration (Wakala fee). For the insurance assets invested on behalf of participants' fund(s), the Takaful operator must use the al Mudaraba model, and must receive a set percentage of the profits generated from the investment portfolio. No performance fees are allowed to be paid to the shareholders/Takaful operator of the Takaful firm.	An insurer agreed. No performance fees should be paid to the shareholders, if this is in violation of the Sharia otherwise this should be permitted, because it could lead to perhaps reductions in wakala fee upfront.	SP4	As mentioned in GR9 above, performance fee will not be allowed.
	An insurer does not understand why a performance fee would not be permissible as this incentivises the Takaful Operator to act in accordance with the interests of the Participants.	SP5	See comment SP4 above.
CA-8.2.2A The Wakala fee must be a fixed upfront fee and be expressed as a percentage of contributions. The Wakala fee must be clearly stated in the Takaful contract and	An actuary stated that the term “upfront wakala fees” should be made clearer. It is assumed that the suggestion is to fix the wakala fees up front (i.e., before the contract is issued). Also the suggestion to express the wakala fees as a	SP6	Wakala fees should be calculated and disclosed before a contract is issued. Wakala fee may vary from product to product.

Industry Comments and Feedback
Volume 3
November 2013

<p>agreed to by the participant.</p>	<p>percentage of contributions only is not supported as this will reduce flexibility. For example it is more equitable sometimes to charge the wakala fee as a fixed amount plus a percentage of contributions. If the intention is to limit the total charged to the participant this can be achieved by stating that the wakala fee should not exceed ??% of the contribution.</p>		<p>We agree with the comments that there are certain expenses which do not vary with the contribution size and hence it is not practical to express all the expenses, which constitutes Wakala fee, as a percentage of contributions.</p> <p>In light of the above, paragraph CA-8.2.2A may be amended as follows:</p> <p><i>“The Wakala fee must be a fixed upfront fee, which may be expressed as a percentage of contributions. The Wakala fee, once fixed, shall not be adjusted during the reporting period, and must be clearly stated in the Takaful contract and agreed to by the participant.”</i></p>
	<p>An insurer noted that expressing this as a percentage of upfront contributions is impractical as some form of charges do not vary with contribution size. For example, administration expenses and therefore administration charges are the same for unit-linked plans irrespective of the size of the contribution.</p>	<p>SP7</p>	<p>Please see the comments in SP6 above.</p>
	<p>An insurer stated that the Wakala fee should be charged on the entire pool, since the takaful contract is a unilateral contract, from a sharia perspective. What would the role of the SSB then be with regards to the management or as the</p>	<p>SP8</p>	<p>Disagree with the comments as the Wakala fee must be clearly stated in the ReTakaful contract and agreed to by the Takaful operator.</p>

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

	<p>trustees of the pool? Would varying wakala fees (due to negotiation) not then be assimilated with risk transfer as opposed to risk sharing? In their view Wakala fees are proprietary information and its disclosure would dilute the competitive advantage of one operator over the next. Full disclosure to the CBB is however agreed. From a Retakaful perspective they reflect in the Retakaful Contract the maximum wakala fee that they charge. Furthermore their Sharia Board has approved in principle an incentive wakala which can be paid to the Operator, subject to satisfactory performance of the Pool. They therefore are not in agreement to only fixed wakala fees. For the record they have to date, not receive incentive wakala.</p>		<p>Wakala fee is to be determined upfront on a prospective basis and should not be adjusted retrospectively, based on the performance of the pool. Hence, the incentive Wakala is not allowed under the new rules.</p>
<p>CA-8.2.2B The Wakala fee must cover the total sum of the following components: (a) The management expenses; (b) The distribution expenses including intermediaries' remuneration, agents' commission and other expenses involved in making Takaful products available to the public; and (c) A reasonable and appropriate margin of operational profit.</p>	<p>An actuary stated that the words “reasonable and appropriate” should be replaced by more objective guidance as these are too subjective.</p>	<p>SP9</p>	<p>It is left to an actuary to determine and justify what “reasonable and appropriate” is for a particular firm.</p>
	<p>Insurers noted the following:</p> <ol style="list-style-type: none"> 1. Commission is a direct expense of PH Fund and hence cannot be paid out from SH Fund. Wakeel is a manager of the PH Fund and any direct or operational expenses of PH Fund should be paid from PH fund. 2. Will trigger substantial and high level changes in IT systems which will increase the management expense and consume more time. 3. Additional cost will be incurred for hiring 	<p>SP10</p>	<p>Disagree with the comments made. Commission under the new draft rules will be part of Wakala fees and hence to be charged to the Shareholders Fund.</p>

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)
Industry Comments and Feedback
Volume 3
November 2013

	<p>additional resources to manage commission payments, matching and its accounting between PH Fund and SH Fund.</p> <ol style="list-style-type: none"> 4. Need clarification about commission paid on fac-inward business. 5. Need clarification about Reinsurance commission income. 6. Not beneficial to PH fund as it would increase wakala fee expense which would ultimately increase the deficit. 7. Wakala fee is to be fixed upfront at the year beginning - there are expenses such as incentives to distribution channels, bonuses, etc that are known only at the end of the year and as such it is not pragmatic to fix Wakala upfront. Wakala fee should be disclosed upfront “up to a maximum %” and not “as a fixed %” 8. Disclosure about wakala fee to policyholders of participants’ fund – to be defined clearly 9. Performance fee is charged by the operator only when the policyholders fund generates surplus. In the absence of performance fee, there is no incentive to the operator to run the takaful funds profitably. Further, absence of performance fee might lead to acceptance of less than good takaful business to generate additional revenue by way of wakala fee to the Shareholders but might result in large deficit to participants. 		<p>Anything that constitutes Wakala fee will be charged to the Shareholders Fund. Wakala fee is to be determined upfront on a prospective basis and cannot be adjusted retrospectively, based on the actual expenses/performance of the fund. As stated in comment SP6 above, Wakala fee charged <u>may</u> be expressed as a percentage of contributions.</p> <p>Covered under Paragraphs CA-8.2.2A and CA-8.2.2B</p> <p>Performance fee is not allowed under the new rules. Please see comments in GR9 above.</p>
--	--	--	---

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

	<p>An insurer agreed in principle, however all technical expenses or expenses directly related to the takaful business should be for the account of the policyholder. Commissions for example, are a direct result of the insurance business as it is linked to a specific agreement and should therefore be charged to the participant’s pool.</p> <p>In the case of Hannover Re, they charge all direct expense related to the technical operation of the Pool to the Pool. Management Expenses are charged to the Shareholder fund, which naturally comes out of the wakala fees.</p>	SP11	Please see comments in SP10 above.
	<p>An insurers noted that profit margins should be the decision of the Takaful Operator and not subject to pricing constraints, especially in a developing market where support is needed to establish and grow the industry.</p>	SP12	As stated in SP9 above, reasonable and appropriate margin of operational profit is to be determined by an actuary, (as part of the Wakala fee) and recommended to the SSB for their approval.
<p>CA-8.2.2C The Takaful operator must ensure that the management and distribution expenses referred to under Paragraph CA-8.2.2B are paid from the shareholders’ fund and not from the participants’ fund(s).</p>	<p>An insurer stated that in their view Commission and all expenses of a technical nature directly related to the takaful business should be for the account of the policyholder exclusively.</p>	SP13	Do not agree with the comment. Please see comments in SP10 above.
<p>CA-8.2.2D The Wakala fee must be certified by the Takaful firm’s actuary (see Paragraph AA-4.2A.2) and must be considered</p>	<p>An insurer enquired that if the actuary is required to certify the wakala fee and the SSB approve it, is there a real need to have the participant’s agreement? As a professional Retakaful Operator</p>	SP14	The participant agreement is obtained once the participant signs the contract which specifies Wakala fees in clear terms.

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

<p>and subsequently approved by the Shari'a Supervisory Board.</p>	<p>dealing with professional Takaful Operator's they advise the wakala fee that they charge to the takaful operation after agreement of their SSB. They do not in term of a Retakaful operator see the need for actuarial involvement in setting up Retakaful wakala fees. Their pricing mechanism takes that into account.</p>		<p>Under the new rules, actuarial involvement is necessary in determination of Wakala fee.</p>
<p>CA-8.2.6 Only direct expenses related to claims or investments can be paid out of participants' fund(s). The direct expenses related to claims and investments, charged to the participants' fund(s) must be approved by the Shari'a Supervisory Board and must be limited to the amount of expenses incurred.</p>	<p>An insurer stated that having the SSB approve every payment is not feasible. The authorities of the (Re)Takaful Operator may be defined and agreed with the SSB in overall management of the pool.</p>	<p>SP15</p>	<p>SSB need to approve the concept of claims related and investment related expenses and are not expected to approve each and every payment.</p> <p>For more clarity, Guidance CA-8.2.7 was added as follows:</p> <p>The Shari'a Supervisory Board (SSB) is not expected to approve each and every claims related and/or investment related expenses. However, the policy established dealing with the direct expenses related to claims and investments, charged to the participants' fund(s), should be approved by the SSB.</p>
	<p>An insurer noted the following concerns:</p> <ol style="list-style-type: none"> 1. This restriction is not acceptable. 2. What about risk inspection survey fees? 3. What about TPA fees? 4. What about impairment on receivables? 5. What about bank charges on premium collections (i.e. credit card charges)? 6. Any direct expense related operation of PH Fund should be allowed to be accounted under PH Fund. 	<p>SP16</p>	<p>The CBB is of the view that it is the firm's responsibility to determine which expenses are direct expense related to claims and investments and accordingly allocate them to the participants' fund. All direct expenses related to claims and investments that are charged to the participants' fund will not form part of the Wakala fees.</p>

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

	<p>Insurers noted the following:</p> <ol style="list-style-type: none"> 1. This restriction is very harsh and overlooks a number of practical considerations. 2. What about risk inspection survey fees? 3. What about TPA fees on Medical policies? 4. What about impairment on receivables? 5. What about bank charges on premium collections (i.e credit card charges)? 6. Any direct expense related operation of PH Fund should be allowed to be accounted under PH Fund 	SP17	Please see the comments in SP16 above.
	<p>An audit firm noted that reading this Paragraph in conjunction with CA-8.2.4A may raise a question of where the Investment Expenses is going to be charged? Is it from the Gross Investment Income or from the Participant's Fund directly</p>	SP18	Investment expenses would be deducted from the gross investment income to arrive at the net investment income for the fund.
<p>CA-8.3.8 The Rules in this Chapter in respect of the segregation of funds by a Takaful firm are similar to the Rules set out in Chapter CA-3 relating to long-term insurance business. In the case of a family participants' fund(s) this similarity is most pronounced.</p>	<p>An audit firm noted that the case of Family Participant's Fund refers to CA-3 twice. Reconciling both references in one statement would be clearer.</p>	SP19	Noted.

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

<p>However, the Rules set out in Chapter CA-3 still apply even if the participants' fund(s) is a family participants' fund(s), in particular the requirement to separate linked family Takaful business into a separate fund.</p>			
<p>CA-8.4</p>	<p>An insurer noted the following:</p> <ul style="list-style-type: none"> • The concept of earmarked assets is positive to the market. It would avoid the need for Qard Hasan loan to meet solvency requirement. • They requested the CBB to clarify that the retakaful recoveries refers to the receivable from retakaful companies resulting from claims payment. They would need further clarification because if this refers to retakaful assets it also includes retakaful share on claims reserve including IBNR and unearned contribution. If this is the case, it would significantly impact the solvency position of most companies that has exposures on Property and Energy business. The retention of this type of risk is normally minimal due to the severity of loss when it occurs. 	<p>SP20</p>	<p>Noted.</p> <p>Earmarked assets' role is to allocate assets of specified quality for advancing Qard Hassan to the Participants' fund in case of a cash deficit. For solvency deficiency, capital is required to be injected, under the new rules.</p> <p>Retakaful recoveries that are deducted from the total assets of the participants' fund to arrive at the insurance business amount, consist of retakaful share of claims reserve including IBNR and does not include provision for unearned contributions.</p>

November 2013**

	<ol style="list-style-type: none"> 3. Earmarking of assets for complying with solvency of PH Fund is more than sufficient and Policyholders are well protected with earmarking 4. Both Earmarking and Write-off is a double blow to Takaful industry and penalized twice 5. QH given for solvency deficit is nothing but Earmarking of assets. Where is the question of writing off the Qard Hassan provided for solvency deficit? And why again, Earmarking for solvency? 6. The existing accumulated deficits in the PH Fund accounts can be discussed and agreed on case by case basis 7. Conventional companies are allowed to carry on business till they show positive capital available, whereas Takaful companies are required to write-off the Qard Hassan and Earmark assets even though there is positive capital available. This inequality requires CBB's attention and consideration. 8. Companies should be allowed to return back the existing Qard Hassan and instead an undertaking from Board confirming injection of liquidity to PH Fund as and when required can be obtained. 		<p>write-off of Qard was discussed at length with the Takaful industry, subsequent to receiving the comments on the consultation paper, and has been clarified to the industry.</p>
	<p>An insurer noted the following:</p> <ol style="list-style-type: none"> 1. Strongly disagree with this as the amount is still owed by the participants to the Takaful operator and should be recognised as such. This 	<p>SP31</p>	<p>The writing off of Qard Hassan has got nothing to do with the new entrants and only meant for existing firms with</p>

November 2013

Specific Comments:			
Reference to the draft Directive:	Comments	REF	CBB's Response
Module AA			
AA-4.1.4 All insurance firms that carry on general insurance business must consider annually the need to annually commission an actuarial opinion from a Registered Actuary or Signing Actuary. The actuary must satisfy the criteria in Paragraphs AA-4.2.1 to AA-4.2.12.	<p>Insurers noted the following:</p> <ol style="list-style-type: none"> 1. Difficult to accept as it will increase cost and will increase deficit of PH Fund 2. General Takaful products do not change every year and hence the current practice of once in 3 years can be continued 3. The actuarial opinion commissioned once in three years can include ‘Premium Deficiency Reserve’ if required by CBB. 4. Finding a suitable resident actuary at a reasonable cost will be difficult if all insurance companies are required to carry out annual valuation at the same time. 	SP1	<p>Disagree with the comments. It is not just about products, but also about operational controls in terms of certifying Wakala fees, working out earmarked assets quality, etc.</p> <p>Based on the comments received, for General insurance business, Paragraph AA-4.1.4 may be amended as follows:</p> <p><i>“An insurance firm that carries on general insurance business must commission an actuarial opinion, once every two years, from a Registered Actuary or Signing Actuary. The actuary must satisfy the criteria in Paragraphs AA-4.2.1 to AA-4.2.12.”</i></p>
	<p>An insurer noted that Insurance firms should be given an option “to consider the necessity of commissioning an actuarial opinion” as per the existing provision in the rule book.</p>	SP2	Disagree. The requirement is mandatory.

Consultation on Enhanced Operational and Solvency Framework for Takaful and Retakaful Industry Volume 3 (insurance)

Industry Comments and Feedback

Volume 3

November 2013

<p>AA-4.1.5 The Board of the insurance firm must resolve annually either to commission an financial condition report (FCR, or that such a report is not necessary. Where the Board resolves to obtain an actuarial report from an actuary, and a copy of this report must be provided to the CBB.</p>	<p>Insurers noted the following:</p> <ol style="list-style-type: none"> 1. Not applicable to General Takaful business 2. It will increase cost and will increase deficit of both General Takaful and Family Takaful 3. Too much scope and authority is given to actuary and the need for this report is to be clarified further. 4. The actuarial valuation carried out once in three years would be more than sufficient. 5. The Companies can be asked to carry out actuarial valuation on adhoc basis if CBB requires such an action. 6. The Companies can obtain a certificate on wakala fees from external auditors. <p>7. Provision of FCR to policyholders is unacceptable as it represents an unnecessary disclosure of confidential information even to Motor TP policyholders. The Companies do not understand at all the background to this requirement nor its intended objective. It will delay the finalization of year-end audited financial statements as auditors may agree to finalize unless they review FCR.</p>	<p>SP3</p>	<p>The requirement of annual FCR is applicable to Family Takaful business. For General Takaful business, the requirement for an FCR has been revised to once every two years, as mentioned in SP1 above.</p> <p>Hence, Paragraph AA-4.1.5 may be amended as follows:</p> <p><i>“The Board of the insurance firm carrying out long-term insurance business must commission <u>annually</u> a financial condition report (FCR) and an insurance firm carrying out general insurance business must commission an FCR <u>once every two years</u>. A copy of this report must be provided to the CBB.”</i></p> <p>Comment on the provision of FCR to policyholders is noted. Hence Paragraphs AA-4.3.6 and AA-4.3.7 have been deleted.</p>

November 2013

<p>in Paragraph AA-4.2.4.</p>	<p>little working experience. Indeed this may also be the case for a limited number of Fellows though less likely. It is conceivable then that signing authority is given to those who are wholly unsuited to this. My very strong recommendation is not to water down this requirement and to grant approval to Associates only on an exceptional basis where it is clear they have sufficient experience (at least 10 years appropriate experience in a life insurer or a non-life insurer) and standing to warrant this approval. The CBB has worked hard on asserting the training and competency regime but this reverse this work in the actuarial area and is not at all recommended.</p>		
	<p>An actuary stated that this paragraph allows for Fellows and Associates to sign off FCRs. They recommend that only Fellows sign off FCRs, together with a possible explicit experience requirement. An exception could possibly be made for Bahraini nationals who are Associates. The reasons for their recommendation are:</p> <ul style="list-style-type: none"> • Associates are nearly half-way to qualifying as Fellows. They have no exam based specialist knowledge or specialisation in for example General Insurance or Life Insurance or Pensions. Associates can qualify by age 20 whereas Fellows normally qualify after age 25. • The Associate status gives technical abilities such as reserving or pricing, but 	<p>SP8</p>	<p>Please see comments SP6 above.</p>

Industry Comments and Feedback

Volume 3

November 2013

	<p>providing objective assessment of the overall financial condition of the firm will result in overlapping of responsibilities with External Auditors who are already required to provide opinion on the same (“going concern”). Moreover, in the absence of a clear definition for the term “overall financial condition”, it will be left to each party to interpret it.</p> <ul style="list-style-type: none"> • The Actuary and External Auditors of the Firm may have conflicting view on the financial condition of the firm. This might delay the finalization of Annual accounts and in meeting the tight deadline for a company like Arig which is listed on more than one stock exchange. It is not clear whether Actuary should sign the IFR forms for conventional Insurance firm as the same has not been revised in the proposed amendment. (BR.1.1.23). If required, the process will delay the finalization and both the actuary and the external auditor may insist on the other finalizing the report first. • Assessment of pricing and adequacy of premium requires number of inputs particularly for a reinsurance company that writes business globally. It requires enormous time and resources to provide data to actuary and carry out this exercise every year. • As per Article AA 4.3.6, the insurance firm must make available copies of the report or a summary to all policy holders. As the scope 	<p>Disagree as the scope and the perspective is totally different.</p> <p>Disagree as the work of the external auditors complements the work of the actuary. The actuary signs specific certificates in the IFR and not the whole IFR.</p> <p>Noted. No change required.</p> <p>Noted and agreed. Please see comment on SP3 above. The CBB will delete rule AA-</p>
