

Appendix OB-1: Reporting by AISP/PISP

Total Number of Users

Total Number of AIS Users

Total Number of PIS Users

Users refer to end customers.

Total Successful API Calls

Calculated as total number of successful API calls made to all banks.

- **Total Successful API Calls by each ASPSP (Bank)**
- **Total Successful AIS Calls by each ASPSP**
- **Total Successful PIS Calls by each ASPSP**
- **Total Failed API Calls**
- **Total Failed API Calls by each ASPSP**

Average API Availability

To be calculated as the proportion of time an API endpoint was available of total daily API calls to that endpoint. The indicator is calculated as an average for all API calls to all ASPSPs the AISP/PISP is connected with over a period of one month.

- **Average AIS Availability by ASPSP**
- **AIS Availability by ASPSP – Each Use Case**
- **Average PIS Availability by ASPSP**
- **PIS Availability by ASPSP – Each Use Case**

Average API Call Response Times

To be calculated as the average response times of all API calls made to each endpoint. The indicator is calculated as an average for all API calls to all ASPSPs the AISP/PISP is connected with over a period of one month.

- **Average AIS Response Times by each ASPSP**
- **AIS API Response Times by each ASPSP – Each Use Case**
- **Average PIS Response Times by each ASPSP**
- **PIS API Response Times by each ASPSP – Each Use Case**

Note:

The use cases referred to above include all the use cases required as per the BOBF and CBB Rulebook including for all types of accounts (see Paragraph GR-6.1.8 under Volumes 1 and 2).
